KNOW YOUR INVENTORY AND MAXIMIZE YOUR PROFIT

What is myinventory?

my**inventory** is one of the software module offered by wolke business suite designed to enable businesses to effectively manage their organization's' inventory or noninventory items in multi-stores and multi-showrooms, whether that inventory is for internal use or resale.

It is a robust multi-costing (FIFO, Average Stock, LIFO) inventory system that can simplify your multi-currency inventory transactions to provide you online realtime data of inventory levels in stores. Some of the functionalities include recording delivery of inventory in stores, managing any returns and direct additions or deductions from inventory etc.

The system can hold a detailed master file for each inventory item (item name, brand name, re-order level, lead time, quantity, etc.), unlimited locations or shelves in stores and multi-storage packaging.

Basic Functionalities:

- Direct Addition/ Deduction Management
- Store to Store Transfer Management
- Inventory Master Management
- Delivery Notes Management
- Inventory Sub-Ledger
- Inventory Reporting & Inquiry Management

In addition there are many other business solutions of wolke business suite that can be incorporated with myledger as an optional add-on:

myaccount myassets mytime mysales

mystaff mypurchase myledger

my inventory _____

What does myinventory have to offer?

Available on two platforms: browser-based Intranet/ Internet or cloud computing.

Online real-time posting, resulting in online real-time financial reporting.

Bilingual capability: Arabic/English, you log into the system with the language of your choice.

Extensive MIS reporting (in both languages).

Document printout option upon any task performed.

Multi-level access to the system and powerful centralized security control.

What does myinventory use?

Browser interface (totally thin client) for Intranet and Internet use; for easy installation and access from anywhere and anytime, totally user-friendly.

MS express database for reliability, security, ease of use, easy upgrade to MS SQL, powerful data search and other system interfaces.

RDBMS technology for the highest level of data integration, safety and genuine on-line real-time processing allowing for an immediate control of the company's activities.

MS Asp.Net & C# as development tools for highest reliability, security & efficiency.
